In this day and age, the word technology is often associated with elaborate machines, micro devices and digital interaction. While they are programmed to expedite and potentially economize, their very efficacy could leave us feeling alienated, intimidated, and even fearful. Oftentimes, these attempts to reduce human error end up eliminating the human element all together. In the end, we’re left to wonder if there’s purpose beneath the sleek façade and theatrical features.

At TOTO, we believe in crafting technology that matters. We believe that technology is more than just robots and remotes. Much like art, technological advancements should also capture its zeitgeist. It should reflect the progress of its civilization, not dismiss it. It should enhance, not compromise comfort. It should make you feel understood. These thoughts inform our research and motivate us to do better. Our purpose is not to merely launch the latest technological breakthrough but to create thoughtful, innovative products that will enrich the human experience.

TOTO
ABOUT TOTO

Founded in 1917 by Kazuchika Okura, TOTO is the world’s largest toilet manufacturer. Driven by Japan’s spirit of perfection, the company has not only pioneered the development of modern sanitary ware, it has also changed the way we experience the bathroom. Over the years, its unparalleled commitment to quality and innovation has earned the company its reputation as a trendsetting and trustworthy go-to brand for private homes and commercial establishments alike.

Guided by the four pillars of our company motto, TOTO continues to strive for perfection in everything we do:

"Take pride in your work, Strive to do your best, Quality and Uniformity, Service and Trust, Cooperation and Prosperity."

"Take pride in your work, Strive to do your best, Quality and Uniformity, Service and Trust, Cooperation and Prosperity."
TOTO’s first overseas factory was established in Indonesia in 1977 under PT. Surya Toto Indonesia. It is now one of the largest sanitary manufacturing facilities in the world with eight state-of-the-art kilns and a fully automated line.

To highlight the company’s commitment to the environment, our factories are ISO 14001 certified for its environmentally responsible management system. The facility recycles its own water supply and uses Liquefied Natural Gas (LNG) to power its kilns, effectively minimizing exhaust emission.

The adoption of advanced technology to make large-scale manufacturing an environmentally responsible practice once again highlights the company’s philosophy of making both the home and the world a better place.
The company is established by Kazuchika Okura under the name of TOYO TOKI CO., Ltd., which is later renamed to TOTO. Five years previously, in 1912, Okura had set up a laboratory to develop the kind of sanitary ceramics that had become common in Europe and America. With its first sales, Okura’s company begins challenging accepted notions of cleanliness, something that TOTO continues to do today.

The Great Kanto Earthquake strikes, devastating Tokyo. A sewage system is built during the reconstruction and the demand for sanitary ware grows rapidly.

After World War II, TOTO begins to manufacture metal fittings and faucets as well as ceramics. Ever since, innovation in the field of precision machining technology has gone hand-in-hand with developments in the firing and casting of sanitary ware as two of TOTO’s core businesses.

Japan is in the midst of its economic miracle when it hosts the 1964 Tokyo Olympics, and is enjoying the construction boom that accompanies it. TOTO is again at the forefront of bathroom technology, developing the prefabrication methods necessary to meet the need for mass production, which saves time and energy on construction. The modular prefabricated bathrooms TOTO creates for the 1,044 rooms in Tokyo’s Hotel New Otani, opened for the Olympics, shows how the company has perfected the combination of technology and design.

TOTO’s first overseas factory opens: PT. Surya TOTO Indonesia.

TOTO launches the WASHLET, providing consumers with a whole new level of cleanliness and comfort. It quickly becomes a Japanese cultural and commercial sensation.

Following in the wake of the WASHLET, TOTO starts moving its advanced technology into other products by introducing high-end modular kitchens.

TOTO begins trading in the USA, having already extended into Indonesia, Korea, Thailand, Taiwan and Hong Kong. TOTO expands business to China in 1994.

The launch of the NEOREST toilet brings about the fullest realisation yet of the principle of Clean Technology, incorporating the WASHLET and a comprehensive range of TOTO’s innovations into a bathroom of the highest aesthetic and performance quality.

TOTO launches HYDROTTECT, a patented photocatalytic technology. The material’s surface self-cleans and breaks down pollutants in the air, making it ideal for external use. Easy to clean, it eliminates odours and bacteria – making it ideal for internal use, too.

The TOTO Universal Design Research Centre is built. Its purpose is to create new products through an extensive process of customer dialogue and feedback.

TOTO launches in Europe at the ISH Exhibition in Frankfurt, 10-14 March.
DESIGN

Design has become an integral part in our everyday lives. It is more than a superfluous façade but a manifestation of superior creativity, one that blends beauty and function in one seamless form.

At TOTO, design is not about adhering to trends but innovating a solution for modern living. Our designs are inspired and informed by your everyday routine to create a personal sanctuary where everything is exactly the way you want them.
DESIGN | RESEARCH AND DEVELOPMENT

Our Research and Development center continues to create new and improved products that blend form and function. Located in Kokura, a port town on the northern edge of Japan’s Kyushu Island, TOTO’s headquarters serve as the company’s mother factory and main think tank. This is where TOTO’s breakthrough innovations, such as the Washlet and Neorest were conceived. The company allocates at least 400 million dollars annually to R&D in an attempt to continually refine and revolutionize your bathroom experience.

At TOTO, the design process is a thoughtful exploration of visual ideas that takes user experience into account. Every superfluous aspect is eradicated so that the appearance of a product never obscures its function. It is more than just add-on ornamentation. Over the years, we have registered countless groundbreaking patents, all of which serve as a testament to our tireless pursuit of achieving that perfect balance between utilitarian purpose and pure, unadulterated beauty.
EASY CLEANING

Inspired by Japan’s obsession with order and cleanliness, our toilets are designed to ensure easy maintenance while adhering to the strictest hygiene standards.

COMPACT DESIGN

Our one-piece toilet features a single, integrated tank and bowl design, which allows for a more compact dimension that is easier to clean.
SKIRTED DESIGN

The skirted design conceals the unsightly trapway, creating a sleek silhouette that eliminates hard-to-reach places.

RIMLESS DESIGN

The rimless design prevents dirt and germs from getting trapped, making for a more attractive, not to mention more hygienic toilet.
CURVILINEAR DESIGN

The curvilinear design of our lavatories minimizes corners and edges that are difficult to clean.

Our ceramic products also feature an extremely low water absorbency level, which minimizes the accumulation of deposits, hence making them more hygienic and long lasting.

ELEVATED DESIGN

The Wall Hung toilet is elevated from the floor, creating a more open sense of space while allowing you to easily clean the floor.
As the world’s population continues to increase and we become more space-strapped, design plays a crucial role in providing an efficient yet comfortable personal space.

CONCEALED SYSTEM

The Wall Hung toilet conceals its water tank behind the wall, thus freeing up extra space in the bathroom.
**Semi-Recessed**

The semi-recessed lavatory can be easily fitted into an existing countertop for extra storage or space.

**Barrier Free**

Our barrier free products are created to ensure maximum comfort for the aged and the less abled. The concave counter design allows for better, unrestricted access.
Innovation is more than newness or nowness. It is an ongoing dialogue with the environment we live in, and our environment is changing at an alarming rate. It is now more imperative than ever to conserve resources and minimize CO2 emissions.

TOTO Technology is invented to protect the planet as well as push boundaries so you won’t have to choose one over the other. All of our features are the result of careful and thoughtful planning so that they may be of service to you and the environment.
Since its founding, TOTO has always been aware of the tremendous value of water. Today, with the increasing threat of global warming and prevalence of water shortages, we are compelled to redefine our relationship with this essential resource. Now more than ever, TOTO strives to help sustain the environment through the development of high-quality, water-efficient products.

Turning on a faucet and taking a shower may seem like ordinary activities but they are also opportunities to save water and reduce CO2 emissions. Adding “protection of water resources” to our list of Global Environment Goals highlights our effort to produce technologies that facilitate environmental sustainability.

TOTO will work as one with various local communities to meet these crucial objectives. We sincerely hope that our involvement will lead to better living and consequently, a better tomorrow.
DUAL FLUSH

As early as 1976, TOTO released a new toilet that uses 13 liters with each large flush, achieving water savings of 35% compared to earlier toilets. Since then, we have continued to increase water efficiency. In 1999, TOTO launched its first dual flush technology, minimizing water usage to 6 ltr/3 ltr. Now, our toilets use the 4.5 ltr/3 ltr dual flush system for solid and liquid waste respectively.

Despite these breakthroughs, we’re careful not to compromise comfort and functionality. All of our toilets have passed some of the world’s toughest flushing standards including the United States, Japan, and Singapore. Each and every single toilet is evaluated against our strict Quality Control standards before we install them in your homes.

WATER CONSUMPTION FACTS AND FIGURES

Although 70 percent of the world is covered by water, only 2.5 percent of it is fresh. Of that, only 1 percent is easily accessible.

783 million of people do not have access to clean and safe water.

By 2025, an estimated 1.8 billion people will live in areas where water is scarce.

There are 2.5 billion people who do not have access to proper sanitation.

This awareness, coupled with TOTO’s spirit of perfection has resulted in technologically advanced products that are also eco-friendly. By using TOTO products, you’re helping the environment without even thinking about it.
AERIAL SHOWER

The aerial shower technology aerates the water to create bigger water droplets for a more luxurious feel. Air is drawn in through the showerhead and added to the water, causing them to increase in volume. You will feel as though you’re being rinsed with a generous stream of water, making your shower experience all the more enjoyable.

ECOCAP

Our EcoCap technology uses an ingenious water outlet cap that mixes air with water to reduce water consumption without any loss in stream volume. EcoCap enables full flow rates with just 3.6 liters of water, only 1/3 of the water from other normal faucets. Despite the low water consumption, EcoCap faucets have a full, pleasurable water jet.
When the urinal is seldom used, the flush volume is larger.

When the urinal is used frequently, the flush volume is smaller.

Aqua Auto faucets incorporate two technologies for public facilities. They work together to optimize power and water-saving performance.

Aqua Auto harnesses power through hydroelectric power generation so no power supply is required. The hydroelectric power uses water flow to maintain its rechargeable battery. So, the more you use the sensor faucet, the longer it lasts.

The automatic micro sensor—positioned at the tip of the spout—is operated using the generated power, preventing water from being left running, thus helping to conserve water. Accurate hand detection also means only the minimum necessary amount of water is used.

The urinal sensor technology is ideal for public facilities where strict hygiene standards need to be met and maintained. Its Fuzzy Logic Controlled software regulates the amount of water used based on the duration between each flushing to minimize water wastage while the non-contact auto flush system keeps the environment clean and safe to use.

The Spreader Washing System washes with a smaller amount of water more efficiently compared to the normal plural hole model. Water flushes rapidly from the spreader and thoroughly washes the inside of the urinal.
PERFECTING THE BASICS

Technology is more than just tools and tricks. It’s an evolution of thought. We don’t believe in discarding the old for the new, we believe in perfecting the basics.

The special alloy of the control unit reacts faster than a conventional wax control unit. If the cold or hot water supply is interrupted, the SMA Thermostat will expand or contract to immediately readjust the temperature.

The Shape Memory Alloy (SMA) Thermostat maintains a constant water temperature despite fluctuating water temperatures and pressure levels resulting from water being used elsewhere in the home. The result is water temperature you can rely on, whether you’re in the shower or washing your hands, without having to adjust it manually.
The Cool Touch technology is a thoughtful feature that prevents scalding by shielding the hot water channels with cold water, hence making the surface cool to the touch.

In addition to being convenient and easy to use, sensor-based technologies offer a very decisive advantage: they allow for touch-free operation, an essential factor in ensuring hygiene, which is particularly suitable for public facilities.

Many people are reluctant to use toilets outside the home. They find them unhygienic, or are afraid of coming into contact with bacteria and germs, and falling ill as a result.

This is why hygienic sanitary solutions feature sensor-based technologies, which allow people to use toilets, faucets and hand dryers without touching them and keep contact with the skin to a minimum.

Aqua Auto faucets are perfect for this purpose because the sensor shuts off immediately when not used, thus eliminating the risk of water wastage when a user fails to turn the tap off.
Just as technology has revolutionized every aspect of contemporary life, TOTO’s innovations are changing the way people think about and use bathrooms. TOTO’s products allow for previously unimaginable levels of cleanliness, relaxation and contentment.

With a simple turn of the knob, a nozzle will extend and spray a gentle aerated water jet for as long as needed. Turn the knob shut and the nozzle will automatically retract.

A precursor to the Washlet, the Eco Washer operates without electricity and can be easily fitted to various toilets.

ECOWASHER
First launched in 1980, the WASHLET is TOTO’s signature product. The WASHLET is an electric seat with an integrated wand that uses warm water for personal cleansing. The temperature, position and pressure of the water can be customized according to personal preference.
TECHNOLOGY PUSHING BOUNDARIES

The WASHLET technology incorporates a unique wand that allows water to be used for personal cleaning in a way that leads to a completely new level of hygiene and comfort. Warm water is, after all, much more effective at cleaning than toilet paper. Its temperature and flow are easily adjustable by remote control and the wand self cleans before and after every use. The energy-saving mode can also be activated to increase efficiency.

HEATED SEAT

Not only can you adjust the temperature of the heated seat to suit your individual preference but it warms itself up even before you sit down. As soon as you get up, it automatically switches to an energy-saving mode, reducing the heat setting to minimum. There’s even a smart energy-saving function, which automatically adapts itself to daily usage patterns.

MULTI-FUNCTION NOZZLE

The WASHLET technology incorporates a unique wand that allows water to be used for personal cleaning in a way that leads to a completely new level of hygiene and comfort. Warm water is, after all, much more effective at cleaning than toilet paper. Its temperature and flow are easily adjustable by remote control and the wand self cleans before and after every use. The energy-saving mode can also be activated to increase efficiency.
The dryer feature completes the hands-free experience by minimizing the use of toilet paper. Its temperature and strength can be adjusted to suit your individual preference, thereby ensuring the utmost comfort.

The air purifier ensures that the air around the toilet is kept fresh during and after use. The air is sucked in and passed through a powerful filter inside the WASHLET, which effectively eliminates odors.
Trust remains at the heart of everything we do, from Research & Development to Customer Relations. Our excellent track record is a testament to our unrivaled determination to always deliver the best.
ONE STOP SOLUTION

Our comprehensive product range ensures a convenient and hassle-free shopping experience. TOTO provides everything you need to set up a harmonious bathroom system from a single, reliable supplier.

IMPECCABLE QUALITY

Staying true to the Japanese spirit of perfection, TOTO applies a strict 1:1 quality control ratio. This means that our team inspects each and every single product before they're released.

FULL CUSTOMER SUPPORT

TOTO products are subject to international warranty policies. Our service and repair team have been fully trained to provide the best possible service to our customers.
As the world's leading sanitary ware brand, TOTO products are favored by leading architects and world-class establishments. Our products offer quality design as well as efficient features to accommodate large-scale projects. They are also easily customizable to suit your needs.
20 years ago, TOTO introduced NEOREST, a revolutionary masterpiece that defines the modern luxury bathroom. It combines the advanced features found in the WASHLET along with more groundbreaking upgrades while adhering to the highest standards of design.
The NEOREST eases the stress of everyday life with its range of integrated, automatic, sensor-activated functions, including the self-opening and closing toilet lid, the automatic air purifier and the self-activating flush. The auto function also eliminates the need to touch the toilet, further increasing the level of hygiene.
Actilight consists of two phases that actively fight waste and bacteria. Prior to the first use, the WASHLET sprays the toilet bowl with water. Once it is flushed, the WASHLET sprays the bowl with electrolyzed water or Ewater+. This water has antibacterial properties that prevent waste from accumulating.

The toilet bowl also has a special hydrophilic zirconium-coated surface, which helps the electrolyzed water wash the waste away. The toilet lid features a UV light, which is activated once the lid is shut. This light triggers the decomposition process of the waste particles, resulting in a toilet that stays clean over the long term.

Regular water is electrolyzed to give it a slightly acidic pH value, and an antibacterial effect. The Ewater+ is completely environmentally friendly and can be safely returned to the water cycle.
The Tornado Flush cleans and flushes both the rim and bowl in an innovative way. Instead of letting water pour down from the rim as in a traditional flush, the Tornado Flush projects three powerful jets of water from inside the bowl. This motion creates a whirlpool effect that cleans the entire surface, minimizing the need for chemical cleaning agents. It is also quiet and water-efficient.

CeFiONtect

It's impossible to see with the naked eye but untreated ceramics have a rough, imperfect surface. No matter how much you clean it, bacteria buildup is ultimately inevitable. The CeFiONtect glaze is applied before the ceramics are fired, leaving a long-lasting finish that evens out the surface, thus preventing the buildup of mold, lime scale and waste matter.

DESIGNER SERIES

To achieve greatness, one cannot possibly walk alone. We’re constantly inspired by other revolutionary minds whose work reflects the same amount of passion and discipline that mirror our own.

Over the years, TOTO has had the privilege of working with some of the most promising design talents. Their exquisite eye, combined with our engineering expertise, have resulted in some of the most popular sanitary ware series. We love the challenge of realizing artistic visions into meaningful everyday objects as much as we are proud to have played a part in supporting the creative industry.
Graduated from the Politecnico di Milano, Francesco is the proud recipient of the first ADI prize for his ‘Translazione’ folding chair project. He has over 25 years of experience in the fields of architecture, interior and product design. He also teaches at the Politecnico di Milano under the Faculty of Design and is part of the managing board of ADI Lombardia.

Francesco designs the Le Muse series, which is characterized by its sinuous curvilinear shape.

Graduated from RMIT University in Melbourne, Australia, Alvin’s passion for art and design is complemented by his love for Indonesia, which is evident in his choice of materials and consistent involvement in the preservation of local heritage. Following an internship with world-renowned industrial designer Marcel Wanders, Alvin started his design studio, alvinT in 2007. His designs have been exhibited at the Salone Satellitte in Milan, Melbourne Design EX and Ambiente’s Talents in Frankfurt among others.

Alvin designs the TOJA series, which is characterized by its bold rectangular shape.

WASHLET
Since its invention in 1980, the WASHLET has singlehandedly revolutionized global hygiene standards. It is an electric seat with an integrated nozzle that uses warm water for personal cleansing. The WASHLET is incredibly versatile, not to mention simple and easy to use. It accommodates most TOTO toilets for perfect integration and its self-cleansing features ensure easy maintenance. More than just a technological feat, the WASHLET delivers inimitable comfort for the ultimate bathroom experience.

**EASY REMOVAL**

The incredibly versatile WASHLET seat cover can be easily removed and re-attached to ensure easy cleaning.

**CUSTOM CLEANSE**

The WASHLET wand sprays streams of water with varying pressure and motions to accommodate your individual preference.

**HEATED SEAT**

Adjustable temperature setting to ensure individual comfort.

**DEODORIZER**

Air purifying technology to maintain a fresh and sanitary environment.

**DRYER**

Innovative drying feature to sustain hygienic, hands-free use.

Details are not just details. They make the product.
At TOTO, we are committed to creating superior products that enhance your life and ensure your safety. Our range of sanitary fittings is designed using the most advanced technology to protect you from environmental inconsistencies.
All of our fittings are fashioned using pure brass. Strong and durable, this copper-zinc alloy also has antimicrobial properties and is resistant to corrosion.

All of our fittings are put through a systematic de-leading treatment to eliminate the possibility of lead contamination. It removes 99.5% of lead from the surface, which would otherwise come into contact with water.

Our aerator technology mixes air with water to reduce water consumption without compromising comfort. This means that you will still get to enjoy a full, pleasurably water jet and save on your water bill.

All of our fittings are chrome plated to prevent rusting and ensure durability. At 0.5 micron (replace w/ symbol), our chrome plating is one of the thickest in the industry.

All of our cartridges are rigorously tested to ensure their durability. Each and every single one of them goes through at least 200,000 cycles before they’re approved for distribution. The cartridges are crucial as they serve as a filter to distill sand and other potentially harmful impurities.
ELEMENTS OF STYLE

Our extensive collection of sanitary fittings ensures complete freedom of expression. Each series is designed to make an individual statement that is uniquely yours.
